Year-To-Date (Jan)	57	81	77	48	-37.66%
Last 12 Months (Feb-Jan)	64	66	55	48	-12.73%

We just closed out a very strong year of home sales in Harrisonburg and Rockingham County and are now looking at just one month of data for 2017. As such, throughout this report, I will be reflecting on January 2017 data, as well as data for the past 12 months -- February 2016 through January 2017. As shown above, January 2017

home sales were at about the same place (-3%) as they were last year -- and we are now seeing a 14% year-over-year increase in home sales when viewed from a 12 month perspective. During that same (12 month) timeframe, home prices have increased 3.78%, and median days on market has declined by 13%.

Last 12 Months (Feb-Jan)	53	34	-35.85%	58	58	0.00%

Home sales stayed relatively stable in January 2017 between the City and County -- with a 3.7% increase in the City and a 7.5% decrease in the County. Looking at a longer timeframe (the past 12 months) we see that both areas of our local market (City and County) have seen a healthy increase in sales -- with a 13.37% increase in

the City and a 14.97% increase in the County. During the same timeframe, home prices have increased 3.13% in the County while they have stayed relatively level (-0.30%) in the City. All that said, homes are selling more quickly in the City than in the County based on sales in the past 12 months.

[2] RECENT TRENDS

Month-By-Month Home Sales History Single Family, Townhome & Condo Sales January 2017 **65 Home Sales** JAN FEB MAR APR MAY JUN JUL AUG SEP OCT NOV DEC

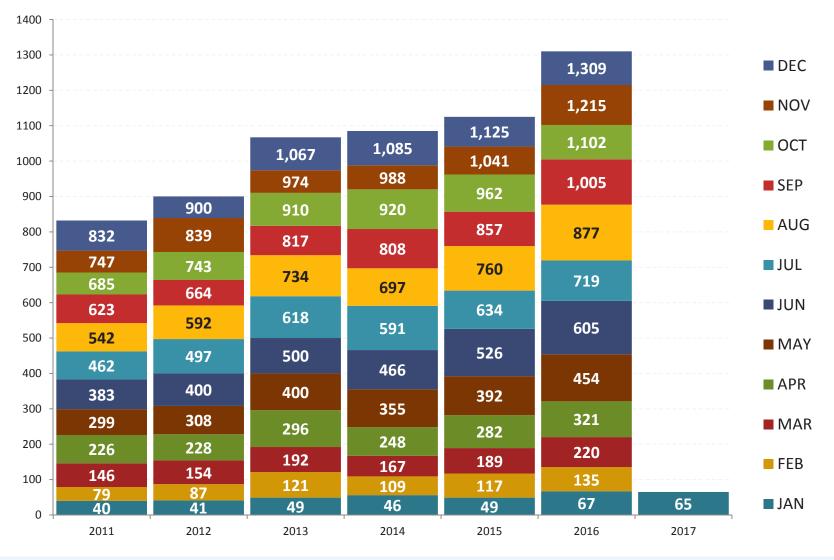

Harrisonburg & Rockingham County

January 2017 looks as we'd expect it to look -- with 65 home sales. This comes in slightly under the pace of January sales last year -- but well above the prior two years. If last year is any indication, we are likely to see a similar amount of sales in February 2017 -- perhaps 65 to 70 sales. Then, we will start to see a moderate

uptick in March, before things really get moving in April, May and June. I am always hesitant to predict too much about the coming year when we have only seen January home sales, as this is a much slower time of year, and is often not instructive as to what the following months of home sales will look like.

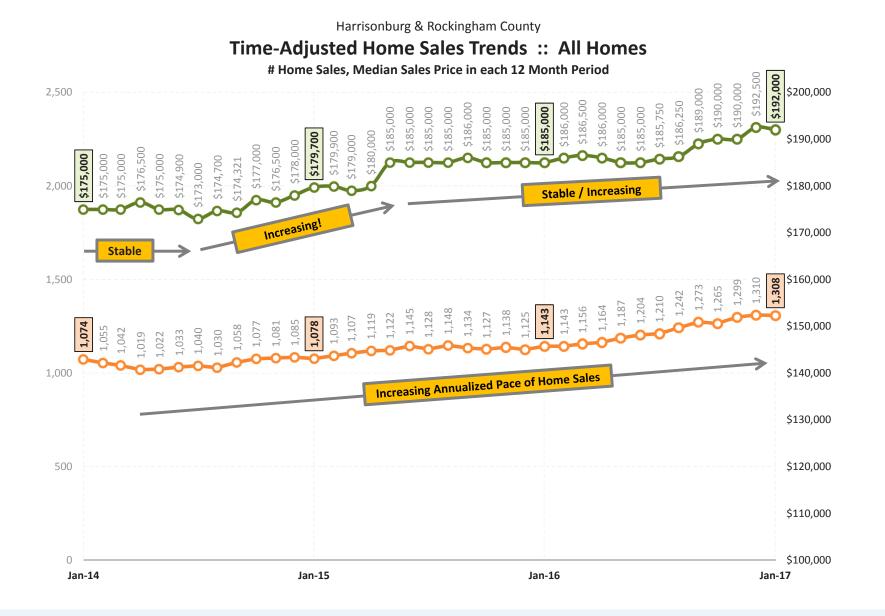

Harrisonburg & Rockingham County

Monthly Cumulative Residential Sales

This colorful graph offers another way to look at the overall sales trends for the past few years in the Harrisonburg and Rockingham County housing market. As shown above, our local housing market experienced small incremental growth between 2013 and 2015 before seeing a sharp uptick in home sales last year in 2016. Thus

far, even with just one month of data to work with, it appears we could have a similar year in store for our local housing market. We will know quite a bit more as we move through February and March, to see if we are keeping on pace with the robust sales seen last year.

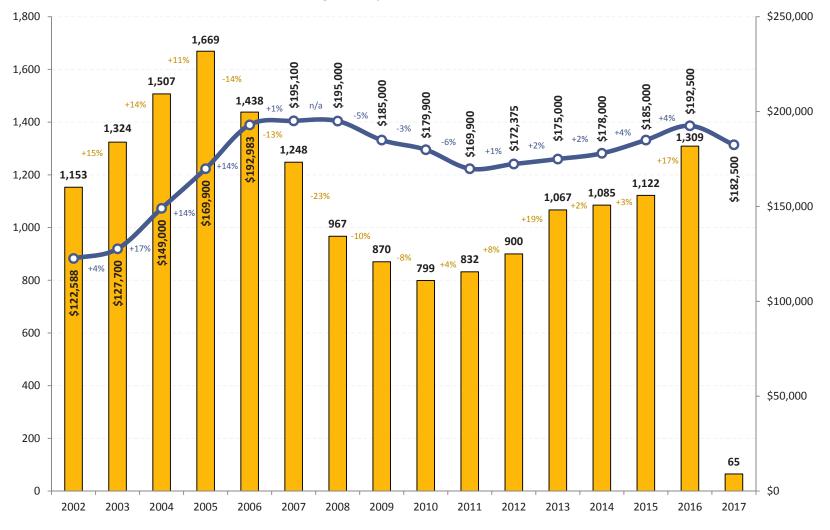

This graph shows a rolling 12 months of the number of home sales in the Harrisonburg and Rockingham County area, as well as the median price of the homes that sold during these time frames. Each data point shows one year's worth of home sales, which eliminates the volatility of evaluating sales figures on a monthly basis. Over

the past three years we have seen relatively consistent increases in the annual pace of home sales, which has now risen to more than 1,300 sales/year. And after many years of median sales prices hovering between \$173K and \$175K, they finally made their way up to \$185,000 by summer 2015 and have now risen above \$190,000.

Harrisonburg & Rockingham County

Home Sales & Price Trends

Single Family Homes & Townhomes

This graph provides an overall indicator of the state of our housing market, showing both the number of homes being sold each year since 2000 (yellow bars) as well as changes in the median sales price during the same time period (blue line). This past year (2016) marks the sixth (!) year in a row when we have seen an increase

(+17%) in the pace of sales in our local market, which was also accompanied by a 4% increase in the median sales price. This 17% increase in the pace of sales far exceeded the increases seen in the prior two years (2%, 3%) and likely contributed to the additional 4% increase in the median sales price.

Home Sales & Price Trends **Single Family Homes** 1,400 \$275,000 \$226,800 \$223,575 \$227,450 \$215,000 \$214,000 \$210,000 \$203,000 \$200,000 1,200 \$195,000 -4% \$195,000 \$192,000 \$190,000 \$225,000 \$184,000 +7% +5% 1,024 n/ .025 -1% +6% -6% 978 1,000 -11% +16% 909 851 ^{+3%} 880 +20% \$175,000 -12% 813 +1% 819 n/c 818 000 798 800 \$170, +169 -15% +21% O +8% 000 678 672 \$125,000 000 653 _{+3%} 47 -11% +10% 602 _{-1%} 595 36, 600 \$75,000 400 \$25,000 200 40 0 -\$25,000 2002 2003 2004 2005 2006 2007 2008 2009 2010 2011 2012 2013 2014 2015 2016 2017

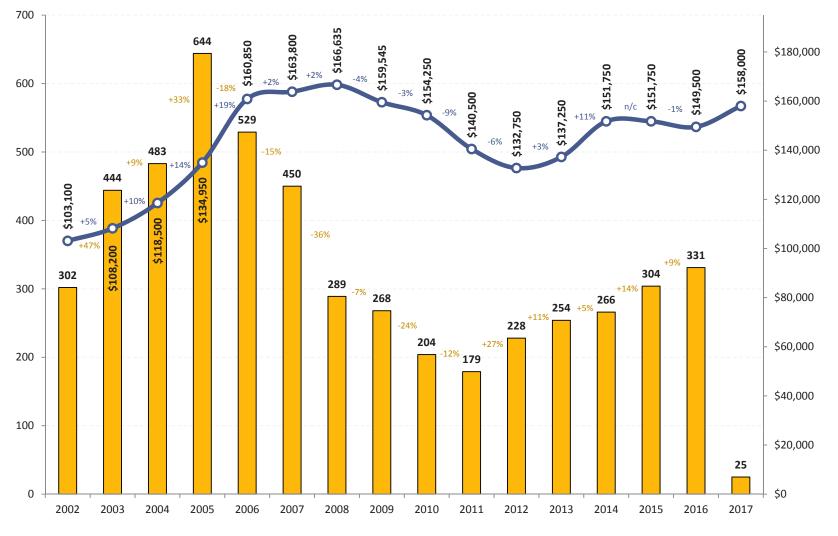

The single family home market in Harrisonburg and Rockingham County improved significantly between 2015 and 2016. After three years of relatively little change in the number of single family home sales (813, 819, 818) we saw a sudden and dramatic increase to 978 home sales. Looking back, there have only been two

years (2004, 2005) when more single family homes were sold in Harrisonburg and Rockingham County. This 20% increase in the pace of single family home sales was accompanied by a 7% increase in the median sales price.

Harrisonburg & Rockingham County

Home Sales & Price Trends

Duplexes, Townhomes & Condos

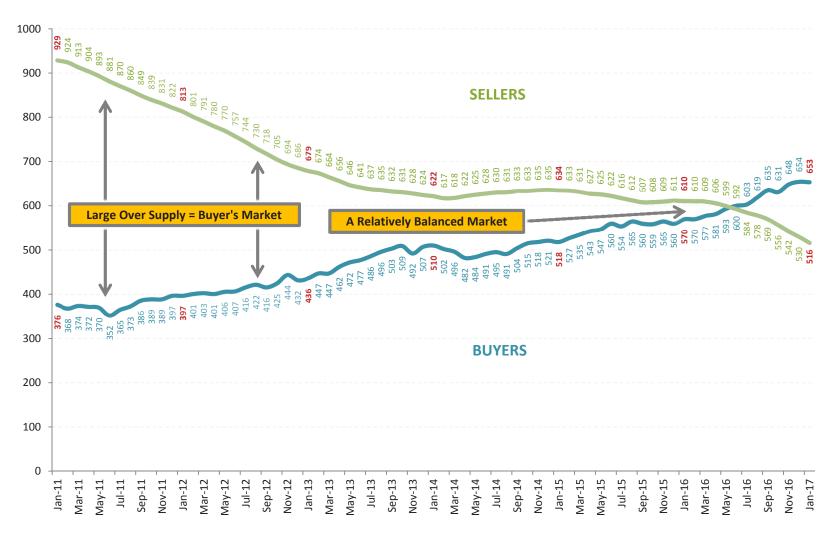

After six years (2005-2011) of rapid declines in the pace of townhouse sales in Harrisonburg and Rockingham County, the pace of sales has been rebounding since 2012. The 331 sales seen in 2016 marked the highest level of sales seen anytime between 2008 and 2016. Despite the continuing increase in the sale of townhouses

(and duplexes and condominiums) we did not see any further market recovery in 2015 when it comes to price, and in fact, the median sales price of these properties dropped slightly to \$149,500 -- down 1% from the median sales price of \$151,750 in both 2014 and 2015.

Market Balance between Buyers and Sellers

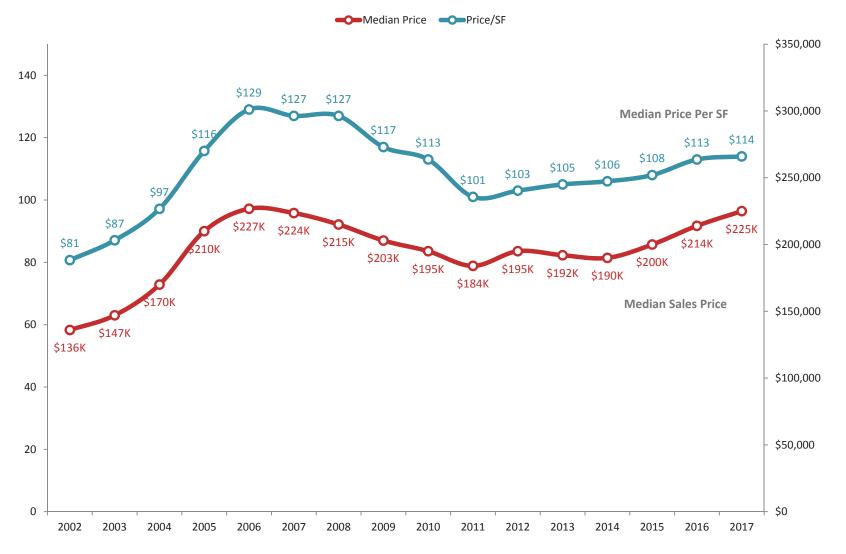

Assuming Six Months of Housing Supply is a Balanced Market

It happened! It really happened! Most housing market analysts consider six months of inventory (active listings) to be an indicator of a balanced market (between buyers and sellers). The "BUYERS" trend line above is illustrating how many buyers are buying in a six month period. The "SELLERS" trend line above is illustrating how

many sellers are in the market (active listings) at any given time. Over the past four years we have seen a steady increase in buyers and a declining number of sellers. And finally, in June 2016, these two trajectories crossed! There are more buyers buying in a six month period than there are homes for sale!

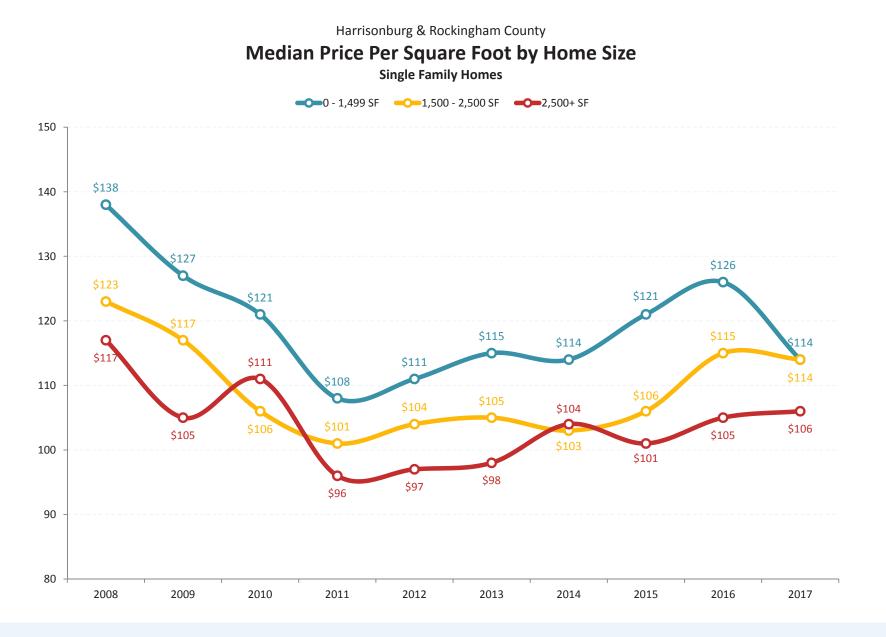

Harrisonburg & Rockingham County Median Price vs. Price Per SF (Single Family Homes)

In addition to monitoring home values by overall median sales prices in our market, it can be insightful to examine the median price per square foot of homes that are selling. The graph above shows the median price per square foot of all single family homes sold over the past 10+ years. The value trend captured by this graph is quite

similar to the trend shown in the single family home median sales price during the same time, which validates that assumed set of changes in home values. Over the past year (2015 to 2016) we have seen increases in both the median sales price as well as the median price per square foot of single family homes.

[3] LONG TERM TRENDS

Price per square foot of single family homes certainly varies for many reasons, including the age, location, lot size and structural characteristics of each home sold. However, there are some similarities in homes of a similar size. In looking at 2016 figures, this graph illustrates that the median price per square foot of larger homes

(2500+ SF) is a good bit lower (\$105/SF) than that of homes with less than 1500 SF (\$126/SF). These values cannot be used as an absolute standard against which the value of any home can be measured, but they can provide some helpful guidance when trying to determine the value of a home.

Median List Price to Sales Price Ratio within the context of Home Sales Pace 2,000 99.1% 99.1% 98.9% 100.0% 98.1% 98.0% 98.0% 98.0% 98.0% 97.8% 97.0% 97.0% 97.0% 97.0% 1,750 1,669 96.0% 96.0% 96.0% 1,507 95.0% 1,500 1,438 1,324 1,309 1,248 1,250 90.0% 1,153 1,122 1,085 1,067 967 1,000 900 85.0% 870 832 799 750 80.0% 500 75.0% 250 65 0 70.0%

Harrisonburg & Rockingham County

This graph shows the average list price to sales price ratio (red line) over the past 15 years as compared to the overall pace of home sales. At the peak of the housing boom (2004-2006) sellers were able to obtain a median of 99% of their asking price --- up from a median of 97.7% in 2001 before the pace of home sales started

2004

2003

escalating. Then, when the pace of home sales slowed (through 2010) we saw a decline in this metric to 96%, where we stayed for three years (2010, 2011, 2012). Sellers started selling for slightly more in 2013-2015 when they could obtain 97% of their list price, and this increased to 98% in 2016.

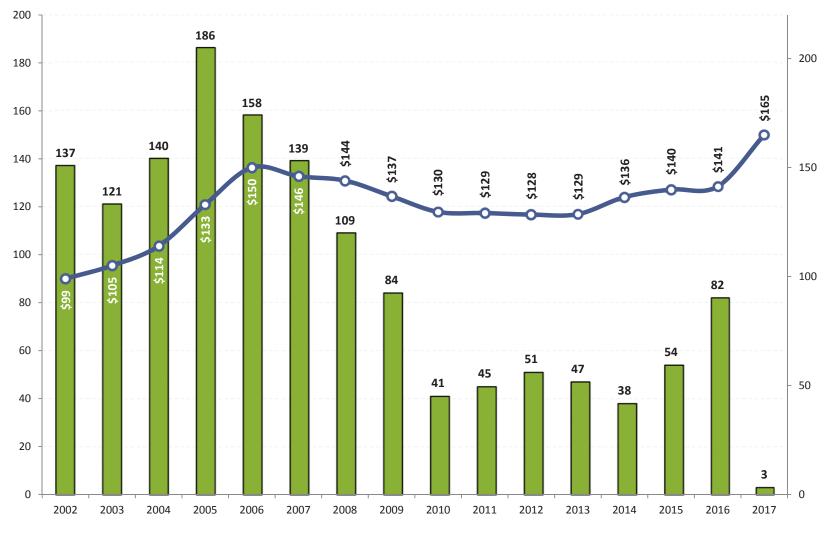

2015

2016

2017

New Construction Single Family Home Sales Trends

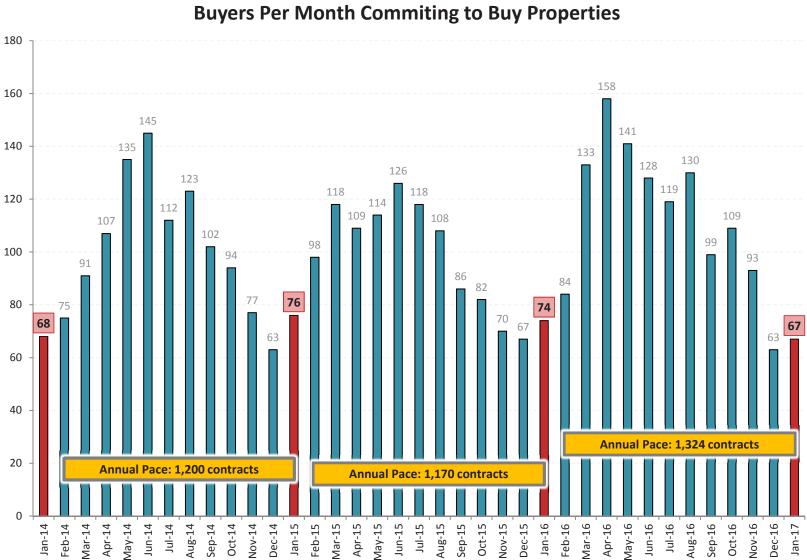

Number of Sales, Median Price Per Square Foot

New home builders experienced a steady decline in new home sales between 2006 and 2010 -- dropping 78% from a peak of 186 to 41 sales in a year. Even if we use a starting point of 2001 (before the housing boom) we still see a 70% drop between 2001 and 2010. The number of new home sales per year has not crept up much

since that time -- staying between 38 and 54 new home sales per year. This past year, however, was QUITE different. There were a total of 82 new home sales last year, exceeding the full year of sale seen for each of the past six years -- a welcome sign for new home builders!

BUYER ACTIVITY

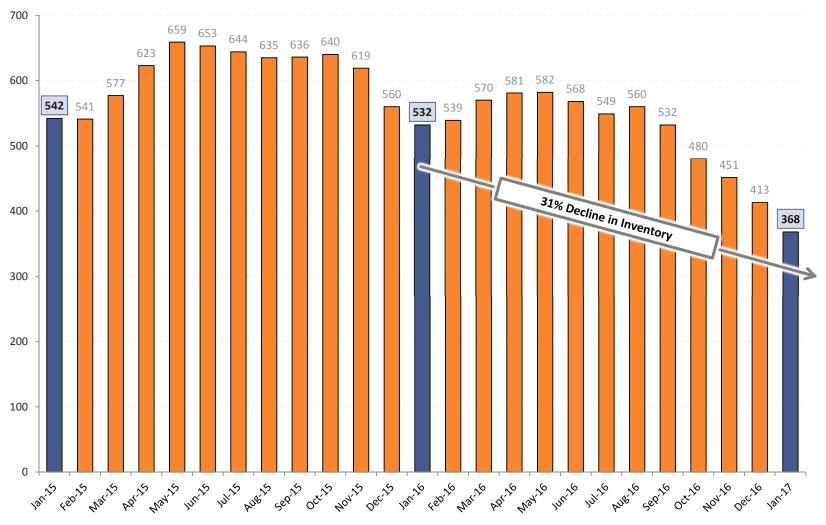

Harrisonburg & Rockingham County

This graph clearly illustrates what a busy buying season it has been over the past year. We have seen an average of 111 contracts per month over the past year -- as compared to an average of only 98 contracts per month during the same timeframe in 2015. As we continue through 2017, it will be instructive to watch these contract

figures to have an early look at what we might see in the way of home sales. Inventory levels are currently very low in several price ranges, which might limit the amount of contract activity we see in 2017. January 2017 contracts (all 67 of them) were slightly below the pace from last January when 74 contracts were signed.

Inventory Levels

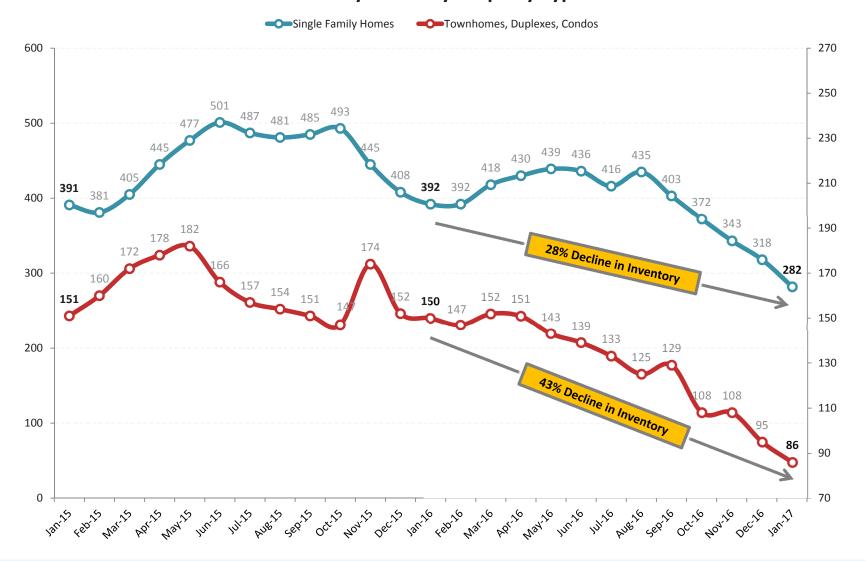

(end of month)

Overall sales activity is the combined effect of many would-be home buyers deciding to make an offer on a particular home -- and those decisions are not typically taken lightly. In contrast, changes in inventory levels are the effect of many homeowners deciding to list their home for sale -- which may be a significant decision, but it is not

always so. Some homes that are on the market have been listed for sale by sellers who are "testing the market" and as a result, inventory levels can shift more quickly than home sales trends. Inventory levels have been declining drastically over the past year -- and are now 31% lower than they were one year ago.

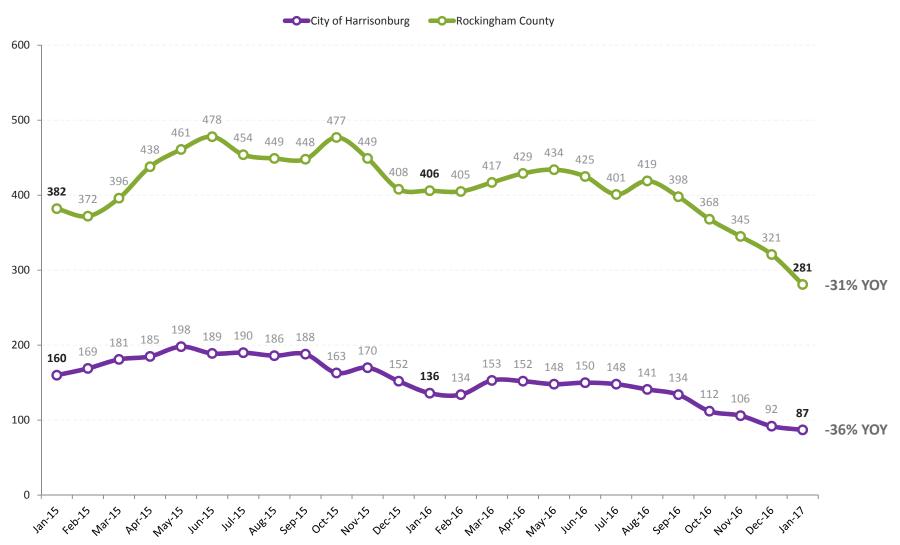

Harrisonburg & Rockingham County
Inventory Levels by Property Type

This graph examines the differences in inventory levels over time when examining only single family homes as compared to attached dwellings (townhouses, duplexes, condos). The number of single family homes for sale has decreased by 28% over the past year, while the number of townhouses, duplexes and condos for sale has

decreased by 43% over the past year. All we can hope is that these inventory levels will start to climb again as we enter the Spring market, as there are many buyers in our local market who are anxious to buy, but not finding many properties that they would like to purchase.

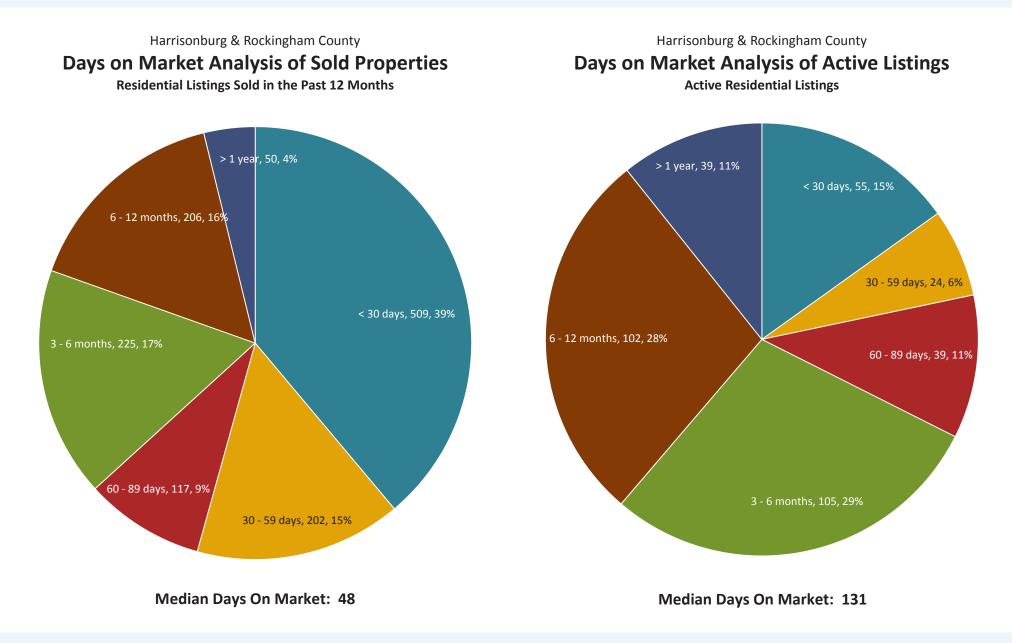

Harrisonburg & Rockingham County Inventory Levels by Property Location

Trends in inventory level currently seem to, in many ways, transcend the City / County divide, but when looking only at inventory levels in the City, we see that there has been a relatively sizable decline (-36%) over the last year in the number of properties for sale, while in the County, there has been a slightly smaller (-31%)

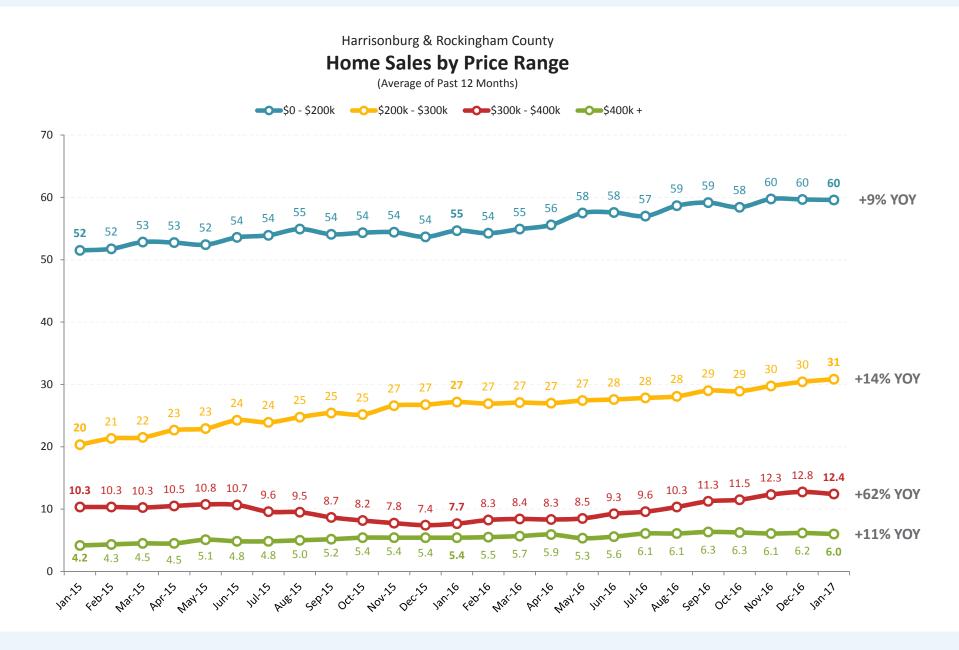

decline in the number of homes for sale. Despite relatively similar comparative changes in inventory levels in the City of Harrisonburg and Rockingham County over the past year, inventory levels in the County seem much more turbulent through the year than they are in the City.

[6] DAYS ON MARKET

Declining inventory levels are contributing to an overall decline in the time it takes to sell a home in Harrisonburg and Rockingham County. The current median "Days on Market" is 48 days for homes that have sold in the past year. Remarkably, 39% of homes that have sold in the past year have gone under contract within 30 days

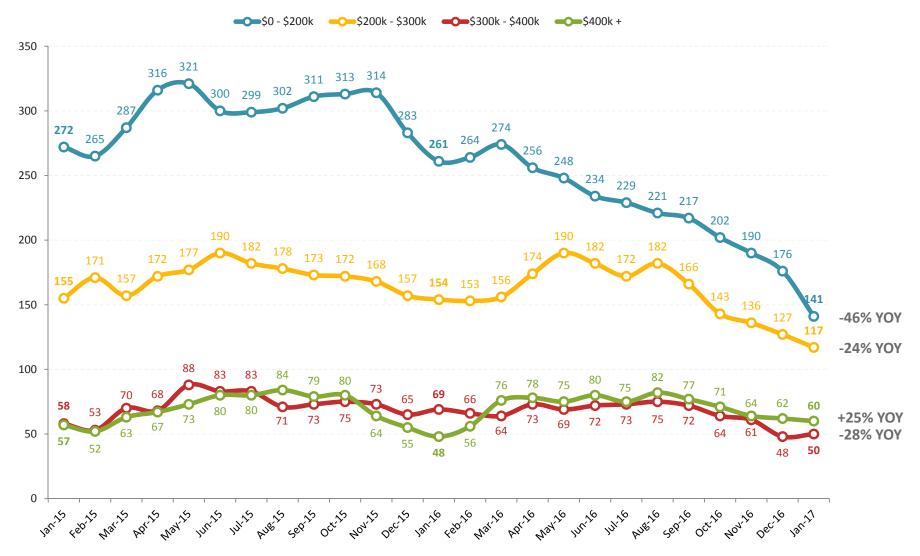

of having hit the market. Combine that with those that went under contract during the second month on the market, and you'll find that 54% of homes that sell go under contract within 60 days. The graph to the right, above, shows the length of time that each active listing has been on the market for sale.

The pace of home sales in Harrisonburg and Rockingham County varies significantly based on price range. The graph above shows the average number of home sales per month (given a 12-month average) as we have passed through the past two years. Home sales have increased in all price ranges over the past year, with the

most significant (drastic!) increase being in the \$300K - \$400K price range (+62% year-over-year) with the other three price ranges (under \$200K, \$200K - \$300K, \$400K+) each seeing between a 9% and 14% year-over-year increase.

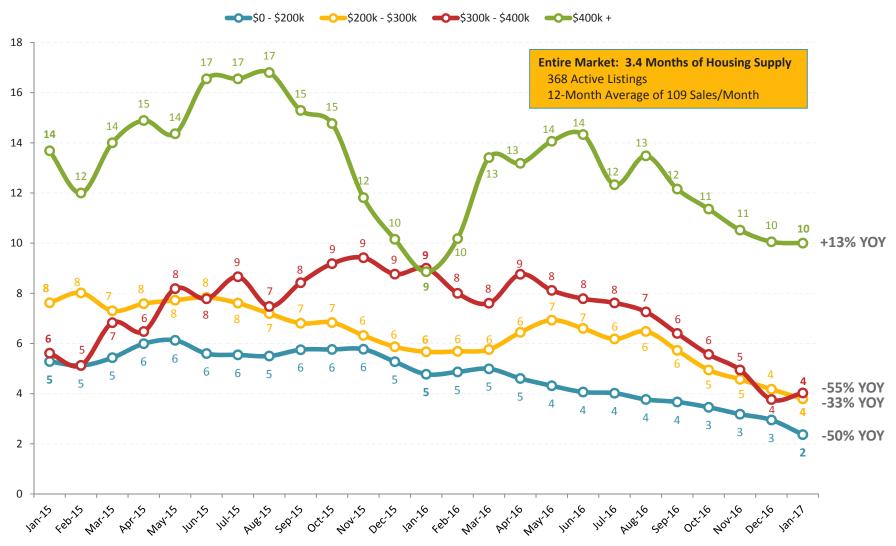

Inventory Levels by Price Range

Inventory levels shift up and down seasonally, but we are also seeing differences in year-over-year trajectories in each of the four price ranges outlined above. The lowest price range (under \$200K) has seen the largest decline (-46%) in inventory levels over the past year -- with buyers in that price range now only having 141

options as compared to 261 one year ago. The \$200K - \$300K price range has seen a 24% decline in inventory, which is relatively similar to the 28% decline seen in the \$300K-\$400K price range. The only price range where inventory levels has increased is the \$400K+ price range where inventory levels have climbed 25% YOY.

Harrisonburg & Rockingham County Months of Housing Supply by Price Range

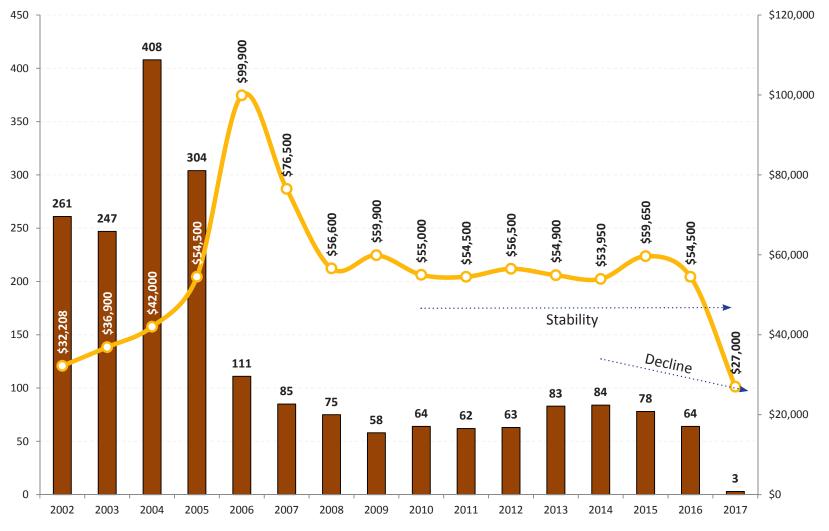

With so many home sales (lots of buyers) and so few homes on the market (not so many sellers), there are low levels of supply in some price ranges our local real estate market. The graph above illustrates that while it would take 10 months to sell all of the homes currently for sale over \$400K if the same number of buyers

bought each month as have been buying (on average) over the past 12 months -- it would only take two months (!!) to burn through the under \$200K inventory. Many consider a six month supply to be a balance between buyers and sellers, and we are now seeing less than that in three of the four price ranges illustrated above.

Harrisonburg & Rockingham County

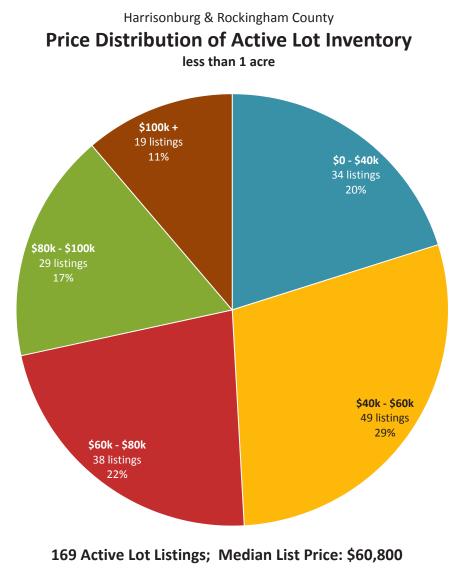

Lot Sales & Median Prices

less than 1 acre

After some modest recovery in the pace of sales of lots of less than an acre over the past few years, there were fewer of these sales in 2016 (64) as compared to 2015 (78) and 2014 (84). That slowing pace of lot sales did not stop sellers in 2015 from being able to obtain higher prices for their building lots with a median sales price

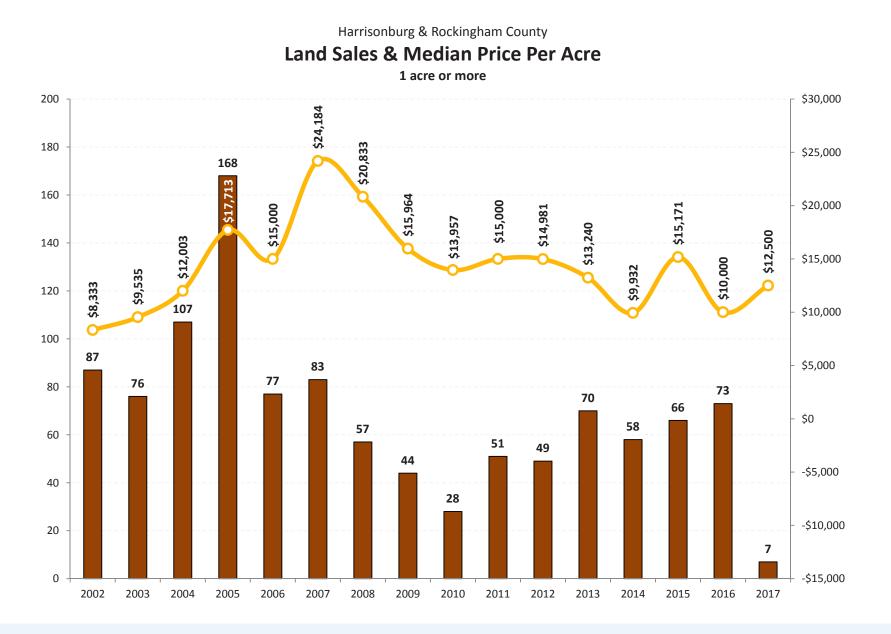

of \$59,650 -- but that median price then declined during 2016 to only \$54,500. Despite the lack of increase in lot sales, we are seeing quite a bit of stability in the median sales price, which has bounced around between \$54,000 and \$60,000 since 2008 and continuing through 2016.

Despite the fact that only 64 lots (of less than an acre) sold in all of 2015, there are a remarkable 169 lots currently for sale. Some sanity exists in this listing market, however, as the median list price of lots for sale (\$60,800) is not too much higher than the 2016 median sales price of \$54,500. Given last year's 64 lot sales, if no

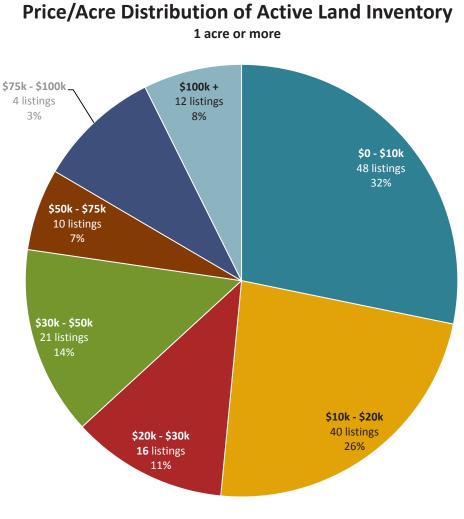

other lots were listed for sale, it would take 2.6 years to sell all of the lots currently listed for sale. As you can see above, a significant portion of the lots currently listed for sale are priced above \$60,000 --- thus many sellers have offering prices higher than recent (2011-2016) median sales prices.

[8] LOTS AND LAND

Parcels of land larger than one acre in Harrisonburg or Rockingham County increased in pace during 2016 to 73 land sales -- marking the highest year of sales since 2007. That said, during that same timeframe, the median price per acre has fallen from \$24,184 (in 2007) down to \$10,000 (in 2016). Some aspects of this "median price

per acre" calculation are affected by which parcels actually sell in a given year, but it is clear that land prices have been trending slowly down over the past five or so years. We will likely need to see more buyer activity (demand) before we will see any meaningful increases in the median price per acre.

163 Active Land Listing; Median List Price: \$19,172 / Acre

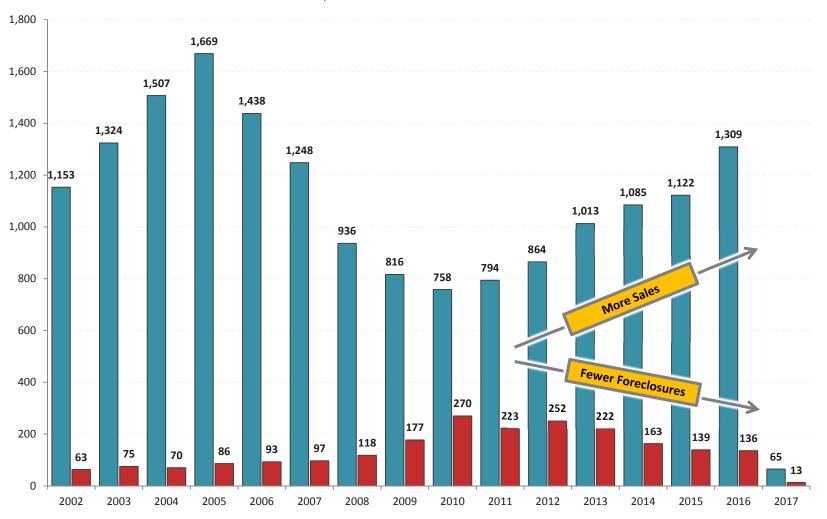

Despite the fact that only 73 parcels of land (of one acre or more) sold in all of 2016, there are a remarkable 163 parcels of land currently for sale. Furthermore, despite the fact that the median sales price of land is hovering around \$10,000 per acre, the median list price of the 163 parcels for sale is currently \$19,172 per acre. Given

last year's 73 land sales, if no other land is listed for sale, it would take 2.2 years to sell all of the parcels of land currently listed for sale. As you can see above, the vast majority of land listed for sale is listed at median prices per acre well above the median sales price per acre.

[9] ECONOMIC INDICATORS

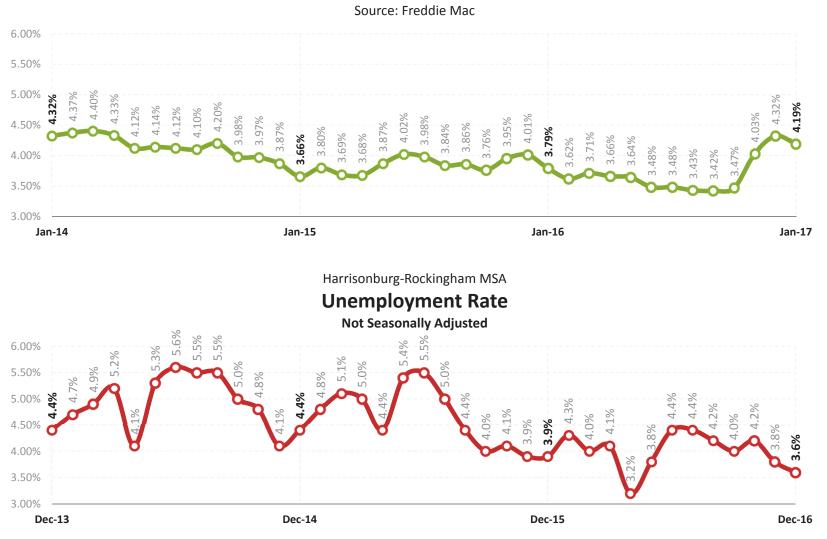

Harrisonburg & Rockingham County Home Sales vs. Trustee Sales

Home Sales per HRAR MLS
Recorded Trustee Deeds

The graph above is a comparison of two imprecise measures -- but the comparison can still be helpful. The blue bars show the number of home sales recorded in the HRAR MLS -- this does not include private sales that did not involve a Realtor, nor new home sales directly from a builder. The red bars show the number of recorded

Trustee Deeds. Some foreclosed properties then show up again as REO properties. The foreclosure rate in our local market area is definitely trending downward, as there were 6.7 times as many home sales as foreclosures in 2014, 8.1 times as many home sales as foreclosures in 2015 and 9.6 times as many in 2016.

Average 30-Year Fixed Mortgage Interest Rate

As shown in the top graph above, for most of the past two years, home buyers have seen tremendously low interest rates -- almost always under 4%. With average mortgage rates now starting to increase, it seems unlikely (though not impossible) that we will see rates in the 3.X% range again anytime soon. The second graph

above illustrates trends in the local unemployment rate -- which has shown a general downward trend over the past several years. A low local unemployment rate and relatively low mortgage interest rates continue to help our local housing market remain stable and start to grow in recent years.

[10] MEET THE ANALYST / REALTOR

Scott P. Rogers, Associate Broker

Scott P. Rogers, an Associate Broker with Funkhouser Real Estate Group, began his real estate career in 2003 and has been working hard ever since to provide exceptional service to his buyer and seller clients in Harrisonburg and Rockingham County. Scott provides detailed, professional and responsive service to all of his clients, whether they are buying their first home or have been through many housing transitions. Since 2010, Scott has been recognized each year by the Harrisonburg/Rockingham Association of Realtors as being in the top 1% of all area Realtors.

Scott earned a B.A. (2000) and M.Ed. (2002) from James Madison

University, providing him formal education in graphic design, management and counseling -- all of which he leverages on a daily basis to the benefit of his clients. Scott's graphic design and web development background allows him to create and utilize high caliber technology and marketing solutions for his clients.

Scott incorporates many innovative tools and technologies to serve his clients including: professional photography equipment, elevated photography equipment, property websites for each of his listings and Matterport 3D Showcase. He leads the local market in the adoption of new marketing techniques - for the latest, check out WalkThroughThisHome.com.

In 2007, Scott began providing in-depth analysis and commentary on the local real estate market via his real estate blog, HarrisonburgHousingToday.com. Since that time, he created many other valuable online resources for the local community such as HarrisonburgHousingMarket.com, HarrisonburgInvestmentProperties.com, HarrisonburgApps.com, HarrisonburgAssessments.com, HarrisonburgPropertyTransfers.com, HarrisonburgTownhouses.com, BestDealsInHarrisonburg.com and many others.

Scott is a member of the Shenandoah Valley Builders Association, serves on the Board of Directors for the Shenandoah Valley Children's Choir and East Rockingham Recreation Association, and is the co-founder of TakeThemAMeal.com. Scott and his wife, Shaena, live in Rockingham County with their two children, Luke and Emily. In his free time, Scott enjoys spending time with his family, traveling, camping, playing volleyball and attending JMU sporting events.
